

# ATTENTION BOATERS

Do you know how to use your flares?

What do you do with expired ones?

It is a legal requirement for most boaters to carry flares and safe handling of these flares is of utmost importance. Lori Mason of Mason's Chandlery in Port Credit is very experienced in teaching about flares and will be giving a presentation about water safety that will include video of the different types of flares in action.

## CPS Water Safety and Flare Seminar

Presented by Lori Mason of Mason's Chandlery in Port Credit

Sponsored by Port Dalhousie Squadron, a unit of Canadian Power and Sail

at the Dalhousie Yacht Club, 74 Lighthouse Road on April 10<sup>th</sup>, 2011 at 10:30 a.m.

This is also an opportunity for you to replenish your supply of flares. Lori will have flares for sale as well as some other boating "goodies". We all know that out of date flares can be dangerous; this is a chance for you to safely dispose of them. Any flares dropped off at the CPS Water Safety Seminar will be handed over to the Niagara Regional Police Explosives Disposal Unit.

Come on out and refresh your water safety knowledge.
